Finishing Touch online photography exhibition

The 'Finishing Touch' exhibition showcases the latest trends in the art of digital retouching and manipulation. Over 80 images demonstrate the technological advances and the immense changes in working practices, which have had an enormous impact on the face of the industry. With the creative software available today opportunities are only limited by the imagination of the creative team.

The demand for such sophisticated imagery results from the increasing visual literacy of the viewing public. This offers a one off opportunity for visitors to go behind the scenes and discover more about the composition of these fascinating digital images.

Finishing Touch was exhibited at the AOP Gallery, London, as part of the AOPdigital season this spring.
